

GoBiGas has chosen Ides software MasterConcept

GoBiGas, tomorrow's energy source load new built plant in Ides MasterConcept

GoBiGas has chosen Ides software Ides Master Concept to manage all technical data and documentation for their new plant.

Ides AB supplies its document and plant data software, MasterConcept, to GoBiGas for managing all technical plant documentation and plant information for the new plant producing Biogas. GoBiGas who are building the first plant in the world of its type are loading all technical plant documentation and technical plant-data. Ides supply within the scope of the project both the software platform as well as consulting services for the documentation data import.

MasterConcept is loaded with documents and data from four main Plant Suppliers and the GoBiGas plant was inaugurated in March 2014.

GoBiGas (Gothenburg Biomass Gasification Project) is the major Göteborg Energi project set out to build a plant to produce biogas via the gasification of biofuel and waste from forestry. When the plant is at optimal production, it will deliver in upwards of 800 – 1 000 GWh, which corresponds to fuel provision for between 80 000–100 000 cars.

About GoBiGas and Göteborg Energi

As Western Sweden's leading energy company, Göteborg Energi provide their customers with energy services, broadband, district heating, cooling, natural gas and the electricity supply network.

Göteborg Energi aim to create energy solutions that are sustainable in the long term. Efficient energy provision is one of the most important building blocks of a well-functioning society. To achieve this goal, Göteborg Energi has developed into a versatile energy company. Göteborg Energi offer services and products that make life easier for both companies and private individuals.

The Plant is being built in Gothenburg harbor close to Rya Power Plant. The plant is build close to the distribution network of Gas, Electricity and Central Heating as well as the fuel intake from either harbor or railway.
